Federal Bureau of Investigation, Enterprise SharePoint Services Project

ENTERPRISE SHAREPOINT SERVICES PROJECT DESCRIPTION

In 2004 the FBI contracted with AIS to design, develop, deploy, and operate Microsoft SharePoint Server as an Enterprise Service to take advantage of Microsoft SharePoint's out-of-the box functionality and custom application development capabilities.

The FBI's Enterprise SharePoint Services environment serves the daily needs of over 42,000 FBI administrative and operational personnel in the United States and around the world on both secret and top secret networks. Since 2004, AIS has delivered over 40 custom business applications that extend the out-of-the-box capabilities of SharePoint. These customized business solutions include a classified Intranet, automated electronic forms, custom workflows, and web content management critical to the criminal and intelligence mission of FBI Special Agents and Analysts. In addition to managing continued operations and maintenance 24x7x365, AIS is currently tasked to develop new mission critical solutions on the Microsoft SharePoint Platform for use by Special Agents, Analysts, and support staff throughout the FBI.

Highlights of this project include:

- Introduction and implementation of Microsoft SharePoint 2010 within 60 days of product release
- Design, scaling and implementation of SharePoint architecture from a single server to a 16 server farm
- 100% on-time delivery record for multiple versions of the CORE intelligence review enterprise application on the Microsoft SharePoint Platform.
- Daily/routine operations and maintenance, including continuity planning/disaster recovery and database administration, user support, and governance.

AIS continues to provide the FBI the following services in support of the Enterprise SharePoint Services Project:

- Program Management
- Project Management and Coordination
- Account Administration
- Infrastructure, Hardware and Installation Services
- Planning and Implementing SharePoint Governance and Policy
- Requirements Analysis
- Business Process Re-engineering
- Software Engineering
- Certification and Accreditation Preparedness
- Quality Assurance and Testing
- Vendor Evaluation and Subcontractor Management
- Training
- Configuration Management and Change Management

ABOUT THE FEDERAL BUREAU OF INVESTIGATION

As an intelligence-driven and a threat-focused national security and law enforcement organization, the mission of the FBI is to protect and defend the United States against terrorist and foreign intelligence threats, to uphold and enforce the criminal laws of the United States, and to provide leadership and criminal justice services to federal, state, municipal, and international agencies and partners.

ABOUT AIS

Founded in 1982, AIS provides software and systems engineering services to companies and the U.S. government. AIS builds software solutions for forward-thinking IT departments, including human workflow applications, portals and websites, enterprise content solutions, digital archives and more – in and out of the cloud. AIS is a top-tier Microsoft partner and a recognized SharePoint and .NET expert, having built many solutions that provide organizations with the ability to collaborate and share information across the enterprise. AIS has Top Secret Facilities Clearance and over 75% of employees hold Secret, Top Secret and Top Secret/SCI clearances. Headquartered in Reston, Virginia, AIS has 5 U.S. regional offices and one in Hyderabad, India.

AIS has been a strategic partner to the FBI since 2004 across almost all operational divisions including ongoing high profile technology initiatives such as Delta, CORE, and the Enterprise SharePoint environment that FBI's ability to carry out its critical mission for our nation.
